

## SUSTAINABILITY POLICY

Promoting sustainable development is a primary commitment for the company **RED LOGISTICA Y GESTION S.A.S.** and its entire multidisciplinary team, in every one of its activities such as congresses, fairs and conventions. Being sustainable implies a condition of doing things well, guaranteeing a balance and the minimum environmental, economic and socio-cultural impact; We have the great challenge and purpose of making efficient and sustainable use of all natural and energy resources, based on a "Sustainability Policy", which establishes a new standard of practices, which invites us to be responsible in all the activities that are carried out, understanding that every action we take every day will be for the benefit and positive impact of tomorrow.

In compliance with the current regulatory framework, some guidelines have been established for the company's sustainability program based on future trends in social, environmental, and economic management, evaluating their needs and promoting with clients, workers and interested parties, the pollution prevention, and the rational use of resources through the implementation, evaluation and continuous improvement of a sustainability management system.

This Policy is part of the company's management policies, it will be published and reviewed annually and disseminated to all workers.
